WORK EXPERIENCE

Full-Stack Software Engineer | Juno Health (DSS, Inc.)

04/2026 - Present, Remote (West Palm Beach, FL)

- Collaborate in a multi-team **Agile environment** with parallel engineering groups delivering features across **large-scale EHR** platforms for pharmacists, nurses, and clinical staff
- Develop **Angular** interfaces with **SCSS and Bootstrap** for healthcare workflows
- Implement **Jest** tests for **TypeScript components** to validate UI behavior achieving **>70% code coverage**
- Build and maintain **C#/.NET APIs** using **Dapper** for data access
- Write **T-SQL stored procedures**, database definitions, and data-access logic supporting application features
- Use **Microsoft SQL Server Management Studio** to develop, test, and troubleshoot database modules
- Produce **technical documentation** for requirement implementations and engineering handoffs
- Integrate **AI-assisted** development workflows using **Claude** to accelerate implementation planning, code review preparation, documentation, and PR pipeline feedback while maintaining engineering ownership

Junior Software Engineer | Applied Research Associates

01/2023 - 04/2026, Baton Rouge, LA

- Supported **U.S. Army** and **Navy** software for logistics calculators and document and lab management
- Developed and maintained **React + TypeScript web applications** supporting complex operational platforms
- Built reusable UI components and **data-driven interfaces** with search, filtering, and hierarchical navigation
- Integrated frontend apps with **REST APIs** and contributed API logic in **C#/.NET, EFCore, Python, and FastAPI**
- Improved testing workflows with **Dockerized environments** and **Playwright/Cypress automation**
- Troubleshoot production performance issues and bugs across UI, backend services, and **AWS environments**
- Manually documented system behavior, APIs, and setup instructions to support onboarding and maintenance

Frontend Development Intern | Exodus Foundation

05/2022 – 01/2023, Remote

- Built **TypeScript UI components** for a browser-based interactive 3D platform
 - Developed a **React single-page application** presenting product updates and roadmap information
 - Collaborated with a startup engineering team to deliver features, bug fixes, and connect **Python/Flask APIs**
-

EDUCATION

Bachelor of Science - Computer Science | Louisiana State University and A&M College

08/2020 – 05/2024, Baton Rouge, LA

- Graduated Cum Laude majoring in Software Engineering; Minor in Mathematics
 - Awards: Dean's/President's List, S&B Engineers Brookshire Award, Academic Scholar Resident Award
-

SKILLS

TypeScript, JavaScript, Angular, React, Redux Toolkit, HTML5, CSS, SCSS, Bootstrap, Tailwind, C#, .NET, Dapper, T-SQL, SQL Server, PostgreSQL, Python, FastAPI, REST APIs, Playwright, Jest, Docker, AWS (Certified Developer Associate), Git, GitHub, GitLab, Jira, Confluence
